# TPE & TPR COMPOUNDS

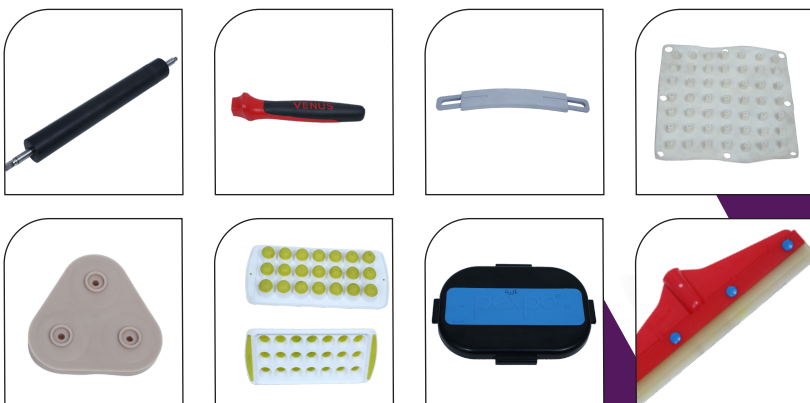

MANUFACTURERS OF HIGH GRADE QUALITY COMPOUNDS

**JUSCOPRENE (TP COMPOUNDS)** - The thermoplastic polymer like polypropylene and the elastomers like SEBS are compounded to provide TP Compounds which are commonly called thermoplastic elastomers or TPE. We call TP compounds as JUSCOPRENE. These compounds are made in Granule or Pallet form on the state of the art extrusion machines. These coloured and or natural plastic pallets are used in the injection or extrusion moulding process to mould various articles and products in a wide variety of Industries. These are formulated in accordance with the BIS Standards and or international standards as per the norms provided.

## APPLICATIONS

Auto Parts (Injection Moulding & Extrusion) | Tools & Garden Tools | Medical Tubing | Cycle Industry & Components | Traffic Cones | Measuring Tapes & Components | Wires & Cables Decorative Coatings | Injection Moulding Applications | Extrusion Applications | Mass Loaded Compound | Screw Drivers Mallets | Gabions | Customization
